

Name: _____ Session: _____

1. Describe, in one sentence or two, the main things that you took out of this lecture. This is mostly to help you when you come back later to review things, and to remember the main points from each session.

2. In the space below, list any topics that you are not sure about, any questions you might have for me, or anything you'd like to review later on. I will answer your questions and return these to you next session.
